Attached are updated excel template files and an updated Scribe template. If the users want to see the fields we added/moved and import data into them, they will need to create their project using this as the template. Else, the samples table won't have an InstrumentID field or any of the air sampling fields we added. When importing however, they will still want to pick air sampling.

Make sense? Let me know if you see anything glaring, it's getting late and my brain is turning to mush.

Thanks.
Melissa

Subject: Signed Las Conchas Fires Data Management Plan and Data Element Dictionary

Lets try this with the attachments.

Hello, I am Matt Loesel and am taking over for Martin McComb as EPA Data Management contact. Please find attached the Signed Data Management Plan and Data Element Dictionary. If you have any questions please let me know. Also when possible please pass along your data contacts, so we can start working with them on SCRIBE and the data management process.
